

DOVETAIL

RENOVATION • CONSTRUCTION • DESIGN

Dovetail: an interlocking joint between two pieces of wood; to fit skillfully to form a whole.

Dovetail builds custom, architect-designed home additions, renovations and new homes. We have been creating high-quality homes and additions in the Twin Cities since 1995.

Relationships with our clients are at the core of our work—clients are essential members of the team. Dovetail is known for its skilled craftsmanship, experience, and attention to the many details that go into building a home.

The following pages will give you a tour of a few of the many projects we've completed. We're proud of these well-integrated additions and renovations—and the beautiful homes built from the ground up.

House transformation, Minneapolis

The owners bought this 1960s home, above, in a neighborhood of beautiful historic homes. They always hoped to transform their home so it would fit well on their block. After ten years of living in the home, they were ready to make a change.

The homeowners wanted a larger, better functioning home in the city for their growing children. The transformed house is now a warm cottage/bungalow style home with many skillfully built architectural details.

- » remodel of 1960s-style starter home
- » 2000-square-foot addition
- » changed style to cottage/bungalow home

The family enjoys entertaining, and their well-equipped kitchen allows them to do so with style.

Our clients loved the character of a classic old house and wanted to live in a neighborhood with history. But they preferred the updated function and design that comes with a new home.

This beautiful home gave us many opportunities to do what we do best—pay careful attention to details, provide high-quality craftsmanship, and work closely with the clients to meet their needs.

The exterior details replicated many of the elements of the original home on the site.

- » almost entire teardown of existing home
- » new home from ground up
- » includes unique elements, such as indoor pool and basketball court

This new home combines prairie school architecture with contemporary elements.

The design allowed us to fully use our fine homebuilding skills—a design this clean requires a high degree of precision and attention to detail.

The home is a welcoming space for the homeowners' family and for entertaining friends and co-workers.
